

PACKARD AVENUE CONSTRUCTION ON TRACK AFTER LAST WEEK RAINS

For details on the construction process,
visit www.cudahy-wi.gov

This is the **second** construction update newsletter for business owners, property owners and residents about the Packard Ave. construction project. The City of Cudahy, Chamber of Commerce, and the Contractor are committed to keeping everyone well informed throughout construction. Safety for all is our number-one priority! Please read and be informed - and thank you for your patience and cooperation during this challenging time.

Road Closure Changes Starting Monday, October 10th

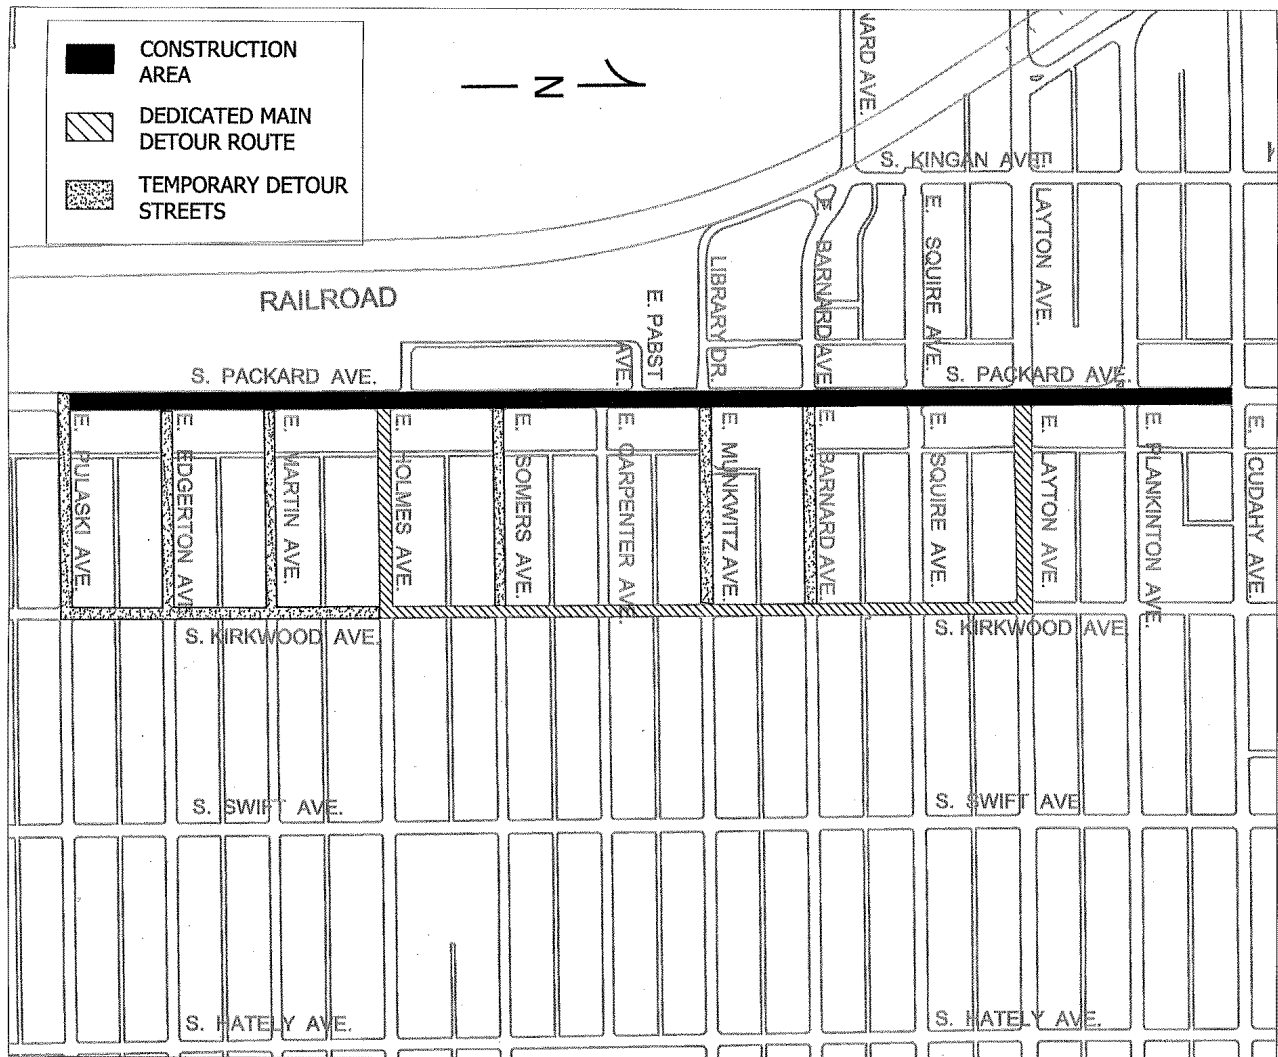

New Information:

- **Work is on schedule and the contractor's second crew will begin relaying the sanitary sewer from East Holmes Ave. to East Pulaski Ave. starting Monday October 10th, 2011.** This area will be closed to traffic during the day while the contractor is working. It will be opened at night with one-lane traffic in each direction. Packard Ave. will be posted NO PARKING in this area!
- **The contractor's first crew continues working North installing water main.** Starting Monday October 10th, 2011, Packard Ave. will be closed between E. Munkwitz Ave. and E. Holmes Ave. The 3600 block of E. Munkwitz Ave. will be the temporary detour route and will have NO PARKING posted on the street.
- **The contractor will be changing road closures starting Monday October 10th, 2011.** Be prepared to see new signage explaining detour routes. You are urged to observe all traffic barricades, warning lights and flag personnel. These control devices and personnel are there for your protection. **Please drive careful and slow down in and around construction zones!**

Reminders:

- **Sidewalk accessibility and access to buildings and store fronts will be maintained throughout construction.** Watch for directional signs noting alternate parking areas.
- **Pedestrians should use caution when walking on sidewalks in and around the construction project.**
- **Use caution when crossing Packard Ave.** Please be careful for loose gravel and uneven ground in areas. There will be barricades and orange fencing around the dangerous construction zones.
- **Please caution children to keep a safe distance from all equipment and excavations.** Construction equipment is fascinating to children, but can be very dangerous even while not in operation.
- **NO PARKING will be in effect on Packard Ave.** within the construction zones and some of the adjacent streets.
- **All streets labeled as temporary detour routes are directed to park on adjacent side streets as close to their residence as possible.** Most of these streets will be posted NO PARKING along one side of the street. Although, some of the narrower streets, may be posted NO PARKING on both sides of the street. The residents that park on this block, shall use nearby blocks for overflow parking. They must be legally parked, and must park in areas without posted NO PARKING signs. Since parking is not allowed on the NO PARKING side of the street, the odd/even night parking restrictions will not apply for this block. However, overnight permitting from the Police Department is still required.
- **Please notice:** While we continue to share details about the construction, please note that changes and updates to the schedule can frequently occur. We will do our best to supply the most up-to-date information.

Please Notice Updated Temporary Detour Routes!
